

Nathanael Greene is a senior renewable energy advocate and is responsible for coordinating NRDC's work on renewable power. NRDC aims to quickly and dramatically expand the use of renewable energy in the most sustainable and cost-effective way. Nathanael has particular expertise in clean energy technologies including on and offshore wind, solar and biomass energy, and in regulations and policies to promote these technologies. For the last decade he has focused on policies to ensure rapid deployment of renewables in ways that avoid, minimize and mitigate impacts on wildlife and is on the board the American Wind Wildlife Institute. He joined NRDC in 1992 after receiving his Bachelor of Arts Degree in Public Policy from Brown University. He worked two years before getting a Master of Science Degree in Energy and Resources from University of California Berkeley and returned to NRDC in 1996. He has worked there since.
