

Wes Jacobs serves as Project Director for Leading Light Wind, Invenergy's first offshore wind project and the only American-led offshore wind project in the New York Bight. Invenergy is a Chicago-based, privately held sustainable energy company.

Wes has 22 years of experience in developing and constructing large infrastructure projects. Prior to joining Invenergy, he worked for two years at Atlantic Shores Offshore Wind; before that he served in a variety of international leadership roles across an 18 year career at ExxonMobil. He has a Bachelor of Science degree in mechanical engineering from the University of Notre Dame and an MBA from the University of Houston.

Wes lives with his wife and two kids in Brooklyn.
